JOURNAL OF THE

AUDIO ENGINEERING SOCIETY

SUBJECT AND AUTHOR INDEX
VOLUME 26—1978 NUMBERS 1-12

SUBJECT INDEX

ACOUSTICS

Time-Delay Spectrometry Investigation of Regenerative Sound Systems—Cecil R. Cable, 26:3, p. 114

A Simplified Equalization Analyzer—William R. Bevan, 26:3, p. 120

Electronic Detection of Acoustic Feedback and Automatic Sound System Gain Control—Eugene T. Patronis, Jr., 26:5, p. 323

Computer-Aided Computation of Room Resonances (Eng. Rep.)—Richard C. Cabot, 26:7/8, p. 537

AES

59th Convention Report—26:5, p. 366
60th Convention Report—26:7/8, p. 564
61st Convention Report—26:12, p. 978

AES Standards and Technical Committees Procedures (Standards)—John G. McKnight, 26:12, p. 968

AES Comes of Age (Feature)—26:12, p. 970

AMPLIFIERS AND PREAMPLIFIERS

Correlation of Audio Distortion Measurements—Eero Leinonen and Matti Otala, 26:1/2, p. 12

Transient Distortion in Feedback Amplifiers—Peter Garde, 26:5, p. 314

Harmonic Distortion in a Class of Linear Active Filter Networks—Peter J. Billam, 26:6, p. 426

Comments on "Suppression of Slew-Rate and Transient Intermodulation Distortions in Audio Power Amplifiers" (Lett.)—Peter Garde, 26:6, p. 451

Author's Reply to Comments on "Suppression of Slew-Rate and Transient Intermodulation Distortions in Audio Power Amplifiers" (Lett.)—W. Marshall Leach, Jr., 26:6, p. 453

Loudness Compensation: Use and Abuse (Eng. Rep.)—Tomlinson Holman and Frank Kampmann, 26:7/8, p. 526

A Note on Loudspeaker Impedance and Its Effect on Amplifier Distortion (Eng. Rep.)—Paul W. Klipsch, 26:7/8, p. 547

Slope Distortion and Amplifier Design—Peter Garde, 26:9, p. 602

BROADCASTING

The Ghent Microphone System for SQ™ Quadraphonic Recording and Broadcasting—Benjamin B. Bauer, Louis A. Abbagnaro, Daniel W. Gravereaux, and Trevor J. Marshall, 26:1/2, p. 2

Quadraphonic Broadcasting of the Filarmonica de las Americas in Mexico (Eng. Rep.)—Benjamin B. Bauer and Gustavo Cota, 26:5, p. 356

CIRCUITS

Precision Pan Pots (Eng. Rep.)—Richard C. Cabot, 26:4, p. 227

Harmonic Distortion in a Class of Linear Active Filter Networks—Peter J. Billam, 26:6, p. 426

Loudness Compensation: Use and Abuse (Eng. Rep.)—Tomlinson Holman and Frank Kampmann, 26:7/8, p. 526

DIGITAL

An Economical Digitally Controlled Audio Level Indicator (Eng. Rep.)—Richard C. Cabot, 26:1/2, p. 36

Digital Audio Standards (Standards)—John G. McKnight, 26:1/2, p. 52

Sampling Frequency Considerations (Standards)—Robert J. Youngquist, 26:1/2, p. 54

A Review of Digital Audio Techniques (Standards)—Martin Willcocks, 26:1/2, p. 56

Some Criteria for the Selection for Sampling Rates in Digital Audio Systems (Standards)—Alastair Heaslett, 26:1/2, p. 66

Report of the AES Digital Audio Meeting (Standards)—John G. McKnight, 26:4, p. 232

Comments on "Technical Factors to be Standardized" (Standards)—P. K. Burkowitz, 26:4, p. 232

Sampling Frequency Considerations (Standards)—Masahiro Kosaka, 26:4, p. 234

User's Note on Digital Audio Standard Code and Procedures, Operational Requirements (Standards)—P. K. Burkowitz, 26:4, p. 242

Sampling Frequency Consideration (Standards)—K. Tanaka and Y. Ishida, 26:4, p. 248

Sampling Frequency Considerations in Digital Audio Standards (Standards)—Teruo Muraoka, Yoshihiko Yamada, and Masami Yamazaki, 26:4, p. 252

Some Notes on Digital Audio Topics (Briefs)—Martin Willcocks, 26:7/8, p. 549

Incremental Floating-Point Coding (Briefs)—Peter R. Samson, 26:7/8, p. 556

A High-Performance Digital Audio Recorder (Briefs)—John A. McCracken, 26:7/8, p. 560

Comments on "Sampling Frequency Considerations" (Lett.)—F. A. Bellis and G. W. McNally, 26:7/8, p. 562

Correction to: "Sampling Frequency Considerations" (Lett.)—Stephen M. Hockstein, 26:7/8, p. 562

Erratum to: "Sampling-Frequency Considerations in Digital Audio Standards" (Lett.)—Teruo Muraoka, Yoshihiko Yamada, and Masami Yamazaki, 26:7/8, p. 562

On Several Standards for Converting PCM Signals into Video Signals (Eng. Rep.)—Toshitada Doi, Yoshikazu Tsuchiya, and Akira Iga, 26:9, p. 641

Digitization of Audio: A Comprehensive Examination of Theory, Implementation, and Current Practice—Barry A. Blesser, 26:10, p. 739

AES Standards and Technical Committees Procedures (Standards)—John G. McKnight, 26:12, p. 968

DISK RECORDING AND REPRODUCTION

Impulse Response of the Pickup Arm-Cartridge System—Stanley P. Lipshitz, 26:1/2, p. 20

Methods of High-Quality Recording and Reproducing of Music and Speech Based on Telephone Research (Reprint)—J. P. Maxfield and H. C. Harrison, 26:5, p. 327

Groove Deformation and Distortion in Recordings—D. A. Barlow and G. R. Garside, 26:7/8, p. 498

Measurement of Cutter Heads by Pulse-Train Methods (Eng. Rep.)—Teruo Muraoka, Hideo Onoye, and Kaoru Totsuka, 26:9, p. 635

In Search of Blumlein: The Inventor Incognito (Feature)—P. B. Vanderlyn, 26:9, p. 660

Comments on "Impulse Response of the Pickup Arm-Cartridge System" (Lett.)—Jacob Rabinow, 26:10, p. 772

Author's Reply to Comments on "Impulse Response of the Pickup Arm-Cartridge System" (Lett.)—Stanley P. Lipshitz, 26:10, p. 774

Automatic Assembly-Line Testing of Cartridges (Eng. Rep.)—Ernst Frandsen, 26:11, p. 856

Improvement of the Noise Characteristics of Amplifiers for Magnetic Transducers—Jean M. Hoeffelman and René P. Meys, 26:12, p. 935

DISTORTION

Correlation of Audio Distortion Measurements—Eero Leinonen and Matti Otala, 26:1/2, p. 12

Transient Distortion in Feedback Amplifiers—Peter Garde, 26:5, p. 314

Harmonic Distortion in a Class of Linear Active Filter Networks—Peter J. Billam, 26:6, p. 426

Comments on "Suppression of Slew-Rate and Transient Intermodulation Distortions in Audio Power Amplifiers" (Lett.)—Peter Garde, 26:6, p. 451

Author's Reply to Comments on "Suppression of Slew-Rate and Transient Intermodulation Distortions in Audio Power Amplifiers" (Lett.)—W. Marshall Leach, Jr., 26:6, p. 453

Groove Deformation and Distortion in Recordings—D. A. Barlow and G. R. Garside, 26:7/8, p. 498

A Note on Loudspeaker Impedance and Its Effect on Amplifier Distortion (Eng. Rep.)—Paul W. Klipsch, 26:7/8, p. 547

Slope Distortion and Amplifier Design—Peter Garde, 26:9, p. 602

EDITORIALS

Editorial—Robert O. Fehr, 26:10, p. 738

EDUCATION

A Survey of Educational Opportunities in Audio (Feature)—Geoffrey L. Wilson, 26:3, p. 160

Theory and Practice in Audio Education: Experience of a Recent Graduate (Feature)—Mark R. Gander, 26:11, p. 890

ELECTRONIC MUSIC

The Use of the Phase Vocoder in Computer Music Applications (Eng. Rep.)—James A. Moorer, 26:1/2, p. 42

VOSIM—A New Sound Synthesis System—Werner Kaegi and Stan Tempelaars, 26:6, p. 418

The Human Finger—A Versatile Electronic Musical Instrument Component (Eng. Rep.)—Robert A. Moog, 26:12, p. 958

HISTORY OF SOUND RECORDING

Discussion of "The Function and Design of Horns for Loudspeakers" (Reprint)—H. Fletcher, V. Karapetoff, S. Boyajian, A. Nyman, E. W. Kellogg, L. P. Rundle, John Minton, and J. Slepian, 26:3, p. 130

A High-Efficiency Receiver for a Horn-Type Loudspeaker of Large Power Capacity (Reprint)—E. C. Wente and A. L. Thuras, 26:3, p. 139

Methods of High-Quality Recording and Reproducing of Music and Speech Based on Telephone Research (Reprint)—J. P. Maxfield and H. C. Harrison, 26:5, p. 327

Auditory Perspective—Loudspeakers and Microphones (Reprint)—E. C. Wente and A. L. Thuras, 26:7/8, p. 518

Comments on "The Function and Design of Horns for Loudspeakers" (Lett.)—Paul W. Klipsch, 26:9, p. 650

A Study of Theatre Loud Speakers and the Resultant Development of the Shearer Two-Way Horn System (Reprint)—John K. Hilliard, 26:11, p. 843

Dividing Networks for Loud Speaker Systems (Reprint)—John K. Hilliard and H. R. Kimball, 26:11, p. 850

AES Comes of Age (Feature)—26:12, p. 970

LOUDSPEAKERS

Discussion of "The Function and Design of Horns for Loudspeakers" (Reprint)—H. Fletcher, V. Karapetoff, S. Boyajian, A. Nyman, E. W. Kellogg, L. P. Rundle, John Minton, and J. Slepian, 26:3, p. 130

A High-Efficiency Receiver for a Horn-Type Loudspeaker of Large Power Capacity (Reprint)—E. C. Wente and A. L. Thuras, 26:3, p. 139

Optical Measurement of Loudspeaker Driver Large Signal Displacement (Eng. Rep.)—John E. Weaver and W. Marshall Leach, Jr., 26:3, p. 145

Passive Crossover Networks for Noncoincident Drivers (Eng. Rep.)—Siegfried H. Linkwitz, 26:3, p. 149

The Use of Boron for High-Frequency Dome Loudspeakers (Eng. Rep.)—K. Ishiwatari, N. Sakamoto, H. Kawabata, H. Takeuchi, and T. Shimizu, 26:4, p. 217

Methods of High-Quality Recording and Reproducing of Music and Speech Based on Telephone Research (Reprint)—J. P. Maxfield and H. C. Harrison, 26:5, p. 327

Evaluation of Acoustic Systems Utilizing Correlation Techniques (Eng. Rep.)—John E. Jacobs and Chau T. Lee, 26:5, p. 343

A Shuffleboard Experiment of Time-Delay Effects in Loudspeakers (Comm.)—Gary C. Gillum, 26:5, p. 361

A Broadcast Monitor Loudspeaker of Small Dimensions (Eng. Rep.)—W. J. J. Hoge, 26:6, p. 444

Three-Dimensional Displays for Demonstrating Transient Characteristics of Loudspeakers—Tsutomu Suzuki, Takashi Morii, and Sumitaka Matsumara, 26:7/8, p. 511

Auditory Perspective—Loudspeakers and Microphones (Reprint)—E. C. Wente and A. L. Thuras, 26:7/8, p. 518

A Note on Loudspeaker Impedance and Its Effect on Amplifier Distortion (Eng. Rep.)—Paul W. Klipsch, 26:7/8, p. 547

Vibration Patterns and Radiation Behavior of Loudspeaker Cones—F. J. M. Frankort, 26:9, p. 609

The Manta-Ray Horns—Cliff A. Henricksen and Mark S. Ureda, 26:9, p. 629

Comments on "The Function and Design of Horns for Loudspeakers" (Lett.)—Paul W. Klipsch, 26:9, p. 650

Comments on "A Novel Approach to Linear Phase Loudspeakers Using Passive Crossover Networks" (Lett.)—W. Marshall Leach, 26:9, p. 650

Comments on "A Novel Approach to Linear Phase Loudspeakers Using Passive Crossover Networks" (Lett.)—W. J. J. Hoge, 26:9, p. 650

Author's Reply to Comments on "A Novel Approach to Linear Phase Loudspeakers Using Passive Crossover Networks" (Lett.)—Erik Baekgaard, 26:9, p. 652

Computer-Aided Loudspeaker System Design Part 1: Synthesis Using Optimization Techniques—G. J. Adams, 26:11, p. 826

A Study of Theatre Loud Speakers and the Resultant Development of the Shearer Two-Way Horn System (Reprint)—John K. Hilliard, 26:11, p. 843

Dividing Networks for Loud Speaker Systems (Reprint)—John K. Hilliard and H. R. Kimball, 26:11, p. 850

On the Need for a Standard Method for Primary Calibration of the Frequency and Wavelength Response of a Magnetic Tape Reproducer (Comm.)—John G. McKnight, 26:11, p. 867

Computer-Aided Loudspeaker System Design Part 2: Determination of System Power Ratings and Some

Design Examples Using Optimization Techniques—G. J. Adams, 26:12, p. 922

MAGNETIC RECORDING AND REPRODUCTION

Sampling Frequency Considerations (Standards)—Robert J. Youngquist, 26:1/2, p. 54

Some Criteria for the Selection for Sampling Rates in Digital Audio Systems (Standards)—Alastair Heaslett, 26:1/2, p. 66

Low-Frequency Response Calibration of a Multitrack Magnetic Tape Recording and Reproducing System—John G. McKnight, 26:4, p. 202

Side-Fringing Response of Magnetic Reproducing Heads—A. van Herk, 26:4, p. 209

A Comparison of Measured and Calculated Fringing Response of Multitrack Magnetic Reproducers—Jan Melis and Bauke Nijholt, 26:4, p. 212

Sampling Frequency Considerations (Standards)—Masahiro Kosaka, 26:4, p. 234

Sampling Frequency Consideration (Standards)—K. Tanaka and Y. Ishida, 26:4, p. 248

Sampling Frequency Considerations in Digital Audio Standards (Standards)—Teruo Muraoka, Yoshihiko Yamada, and Masami Yamazaki, 26:4, p. 252

A High-Performance Digital Audio Recorder (Briefs)—John A. McCracken, 26:7/8, p. 560

Comments on "Sampling Frequency Considerations" (Lett.)—F. A. Bellis and G. W. McNally, 26:7/8, p. 562

Correction to: "Sampling Frequency Considerations" (Lett.)—Stephen M. Hockstein, 26:7/8, p. 562

Erratum to: "Sampling-Frequency Considerations in Digital Audio Standards" (Lett.)—Teruo Muraoka, Yoshihiko Yamada, and Masami Yamazaki, 26:7/8, p. 562

On Several Standards for Converting PCM Signals into Video Signals (Eng. Rep.)—Toshitada Doi, Yoshikazu Tsuchiya, and Akira Iga, 26:9, p. 641

Audio Recording Tapes Based on Iron Particles—A. A. van der Giessen, 26:11, p. 838

How the Magnetic Characteristics of a Magnetic Tape Head Are Affected by the Gap Length and a Conducting Spacer—John G. McKnight, 26:12, p. 930

Improvement of the Noise Characteristics of Amplifiers for Magnetic Transducers—Jean M. Hoeffelman and René P. Meys, 26:12, p. 935

Individual-Track Erase System for a Multitrack Instrumentation Recorder (Eng. Rep.)—Dwight E. Comstock and Edward A. Roberts, 26:12, p. 940

MEASUREMENTS AND INSTRUMENTATION

Optical Measurement of Loudspeaker Driver Large Signal Displacement (Eng. Rep.)—John E. Weaver and W. Marshall Leach, Jr., 26:3, p. 145

Evaluation of Acoustic Systems Utilizing Correlation Techniques (Eng. Rep.)—John E. Jacobs and Chau T. Lee, 26:5, p. 343

Three-Dimensional Displays for Demonstrating Transient Characteristics of Loudspeakers—Tsutomu Suzuki, Takashi Morii, and Sumitaka Matsumara, 26:7/8, p. 511

MICROPHONES

The Ghent Microphone System for SQ™ Quadraphonic Recording and Broadcasting—Benjamin B. Bauer, Louis A. Abbagnaro, Daniel W. Gravereaux, and Trevor J. Marshall, 26:1/2, p. 2

Auditory Perspective—Loudspeakers and Microphones (Reprint)—E. C. Wente and A. L. Thuras, 26:7/8, p. 518

An Effective Mechanopneumatic Shock Mount for a Dynamic Microphone—Terry R. Locke, 26:9, p. 623

In Search of Blumlein: The Inventor Incognito (Feature)—P. B. Vanderlyn, 26:9, p. 660

Design of a Studio-Quality Condenser Microphone Using Electret Technology (Eng. Rep.)—William R. Bevan, Robert B. Schulein, and Charles E. Seeler, 26:12, p. 947

MULTICHANNEL

The Ghent Microphone System for SQ™ Quadraphonic Recording and Broadcasting—Benjamin B. Bauer, Louis A. Abbagnaro, Daniel W. Gravereaux, and Trevor J. Marshall, 26:1/2, p. 2

More Comments on "A Dynamic Noise Reducer for Sum-Difference Multiplex Systems" (Lett.)—Michael A. Gerzon, 26:4, p. 229

Quadraphonic Broadcasting of the Filarmonica de las Americas in Mexico (Eng. Rep.)—Benjamin B. Bauer and Gustavo Cota, 26:5, p. 356

Measurement of Cutter Heads by Pulse-Train Methods (Eng. Rep.)—Teruo Muraoka, Hideo Onoye, and Kaoru Totsuka, 26:9, p. 635

In Search of Blumlein: The Inventor Incognito (Feature)—P. B. Vanderlyn, 26:9, p. 660

PSYCHOACOUSTICS

The Ghent Microphone System for SQ™ Quadraphonic Recording and Broadcasting—Benjamin B. Bauer, Louis A. Abbagnaro, Daniel W. Gravereaux, and Trevor J. Marshall, 26:1/2, p. 2

Mathematics and Sound Perception (Comm.)—Michael A. Gerzon, 26:1/2, p. 46

Fuzzy Alternatives (Comm.)—R. C. Heyser, 26:3, p. 151

Loudness Compensation: Use and Abuse (Eng. Rep.)—Tomlinson Holman and Frank Kampmann, 26:7/8, p. 526

RECORD INDUSTRY

More Comments on "A Dynamic Noise Reducer for Sum-Difference Multiplex Systems" (Lett.)—Michael A. Gerzon, 26:4, p. 229

RECORDING STUDIO

An Economical Digitally Controlled Audio Level Indicator (Eng. Rep.)—Richard C. Cabot, 26:1/2, p. 36

Precision Pan Pots (Eng. Rep.)—Richard C. Cabot, 26:4, p. 227

Methods of High-Quality Recording and Reproducing of Music and Speech Based on Telephone Research (Reprint)—J. P. Maxfield and H. C. Harrison, 26:5, p. 327

Flanging and Phasers (Eng. Rep.)—W. M. Hartmann, 26:6, p. 439

SPEECH

The Effect on Speech Words of Modulating the Temporal Pattern of Infinitely Clipped Speech (Eng. Rep.)—Alex I. K. Menkiti, 26:6, p. 448

SOUND REINFORCEMENT

Time-Delay Spectrometry Investigation of Regenerative Sound Systems—Cecil R. Cable, 26:3, p. 114

A Simplified Equalization Analyzer—William R. Bevan, 26:3, p. 120

A Music Listening System (Eng. Rep.)—T. E. Lynch, 26:4, p. 221

Electronic Detection of Acoustic Feedback and Automatic Sound System Gain Control—Eugene T. Patronis, Jr., 26:5, p. 323

A Program for the Hewlett Packard HP 97 to Assist Sound System Designers (Eng. Rep.)—William D. Symmes, 26:6, p. 430

Computer-Aided Computation of Room Resonances (Eng. Rep.)—Richard C. Cabot, 26:7/8, p. 537

STANDARDS

(For reports presented to AES digital standards meetings, see "Digital Techniques.")

Digital Audio Standards (Standards)—John G. McKnight, 26:1/2, p. 52

Report of the AES Digital Audio Meeting (Standards)—John G. McKnight, 26:4, p. 232

AES Standards and Technical Committees Procedures (Standards)—John G. McKnight, 26:12, p. 968

TELEVISION SOUND

Considerations on Providing Audio Coverage in Television Production Studios (Eng. Rep.)—Bruce Lowell, 26:11, p. 863
